

SPITSBERGEN - EXPEDITION SVALBARD WITH MATTIAS KLUM | MS QUEST

INTRODUCTION

On this Svalbard tour, we are pleased to welcome Mattias Klum, a renowned photographer and filmmaker, as a special lecturer.

The ice has loosened its hold on the islands, allowing passage through the archipelago to the east. On land, we can go on amazing hikes with breathtaking vistas. Svalbard's amazing geology shines through, providing a striking contrast to the glaciers. You have an excellent chance to view some of the true giants, such the beautiful blue whale and the humpback whale, which are frequently spotted in the ocean. You can also view walrus colonies during this season.

We will witness the final moments of the enchanted midnight sun at the start of the journey. When the sun starts to set towards the end of August, we can take in the gorgeous sunsets and warm picture light.

About Mattias Klum

Mattias Klum, born in 1968 in Uppsala, Sweden, is an acclaimed photographer, cinematographer, and director, known for his work in nature and cultural storytelling. Since 1986, he has contributed to numerous international publications, including National Geographic, and has been a key figure in both the documentary and art worlds. Klum has received several prestigious honors, including a medal from the King of Sweden and an honorary Doctorate in Natural Sciences. He is also a Young Global Leader and an ambassador for IUCN and WWF.

DAY 2: Expedition Cruising - Day 2 to 11

Explore Longyearbyen on your own before meeting up your fellow travellers and guides for lunch. In the afternoon we board the expedition ship and sail out through the spectacular Isfjorden - the Arctic expedition has begun! We are now in a part of the world where we are completely dependent on the ice and weather conditions. Our exact itinerary will depend on these factors and on the wildlife we encounter. Our aim is to head out on Zodiac cruises every day and to go ashore when the opportunity arises. Here are some examples of places we may visit:

Northwest Spitsbergen: The scientific village of Ny-Ålesund is located in Kongsfjorden. It was from here that Amundsen and Nobile started their heroic expeditions to the North Pole. Two other courageous attempts to reach the North Pole started on the island of Danskøya. The Swedish explorer Andr   made an attempt with a hydrogen balloon, and the American journalist Wellman started with an airship. Interesting remnants of these expeditions can still be seen here. Magnificent fjords: Svalbard offers visitors countless spectacular fjords. During our journey we will explore some of them such as: Liefdefjorden, meaning "The fjord of love", is lined with snow-capped mountain peaks and here we hope to cruise along the face of the spectacular Monaco Glacier. Many common eiders and pink-footed geese nest in the area. In Krossfjorden we revel in the beautifully sculpted front of the 14th of July Glacier and are greeted by the many kittiwakes and Br  nnich's guillemots that nest on the nearby cliffs. Raudfjorden is an area of immense natural beauty - dominated by magnificent glaciers. It is also a favourite haunt of seals and the bird cliffs are abuzz with activity. Hinlopen Strait and Alkefjellet: Ice conditions permitting, we enter the Hinlopen Strait. Here we find Alkefjellet, an impressive basalt cliff that is home to an estimated 200 000 Br  nnich's guillemots. We may also continue into the beautiful bay of Palanderbukta on Nordaustlandet. Eastern Svalbard: The island of Nordaustlandet is covered by a huge ice cap and has fascinated naturalists and historians alike. Here the giant glacier Br  svellbreen stretches for 180 kilometres! The 15-20 metre high ice edge is punctuated by hundreds of by hundreds of waterfalls. Barents  ya and Edge  ya offer magnificent scenery and vast tundra. Barents  ya and Edge  ya offer magnificent scenery and vast tundra. There is a good chance of seeing walrus, arctic fox and Svalbard reindeer. Southwest Spitsbergen: The grand fjords of Hornsund offer spectacular glaciers and a breathtaking landscape of towering mountain peaks, often reaching above the clouds. On a clear day you can see the summit of the highest mountain, Hornsundtind, at 1431 meters. Hornsund is a favourite haunt of some of Svalbard's polar bears and bearded seals can often be seen resting on the fjord ice.
